Once in a Lifetime School Trip

Tatworth School's Year 6 take an energising trip to Hinkley Point B.

Last week, on Tuesday 8th November, Year 6 visited Hinkley Point B Centre, which is owned by EDF, a Nuclear Power Company. Year 6 had been learning about renewable energy and fossil fuels. Hinkley Point B is located on the outskirts of Bridgewater.

Year 6 left Tatworth Primary School at precisely 8:00AM, full of anticipation. Samuel G, aged 10, told us at MSJ live, that he was looking forward to a fantastic day. Year 6 arrived at the EDF visitor's centre at around 9:30 AM, where they spent the

morning learning about different energies.

After the class had eaten lunch, they got back onto the coach to go to Hinkley B itself. The class had good 'banta' on the coach and finally arrived. They put on: high-vis jackets, ear defenders and protective glasses. Mrs. Webb quoted, "These ear defenders hurt my ears!"

A Great Trip!

The children in Year 6 were amazed by the gigantic station. They were also fascinated by the talks they were given and the armed policemen that had pistols and machine guns.

Year 6 thoroughly en-

joyed themselves and took home a 'Zingy' key ring. It sounds like a fantastic day that children across the country could enjoy.

Yr 6 Bikability

Last Week, Year 6 took part in an amazing opportunity to be involved in a bikeability course! Keira R, a Year 6 pupil, said it was really fun and she is glad she took part.
